WE KNOW HEALTHCARE ANALYTICS

Facktor's Business Intelligence (BI) division leverages data and analytics to further the Quintuple Aim model of care delivery to produce better patient health outcomes, reduce health disparities, improve clinical workforce and patient experience, and reduce high healthcare costs. We provide a full scope of BI services including support with data strategy, data capture and accuracy, data segmentation and analysis, customized dashboards development across clinical, operations, and/or fiscal sectors, performance improvement interventions, and building data empowerment and sustainability. By transforming health center data into actionable insights, we situate clients with the tools for data-driven decision-making necessary to succeed in current value-based care settings as well as upcoming Alternative Payment Models. Facktor's BI division supports with:

- Healthcare Analytics
- Data Strategy
- Data Capture and Accuracy
- Reporting Streamlining/ Automation
- Workflow Redesign
- Clinical, Operations, and Fiscal Dashboards
- Enterprise Resource Planning
- Quality Improvement
- Population Health Management
- HEDIS/UDS Performance Improvement
- Alternative Payment Model Preparation
- Pay-for-Performance (P4P) Optimization
- Clinical Best Practice Implementation
- Interim Analytics and QI Director/Manager Staffing
- Data Empowerment and Sustainability Coaching & Training
